

National Council for  
Occupational Safety & Health

# Regulation on the Organization of Work in High-Risk Occupations

# 1

# Chapter One

## Definitions

## Introduction:

In alignment with the principles and objectives of the National Occupational Safety and Health Policy, issued by Council of Ministers Resolution No. (328) dated 13/06/1442H, which aims to promote safe working environments and enhance preventive protection measures through the development of relevant systems and regulations; and based on the mandates of the National Council for Occupational Safety and Health as stipulated in Article (3) of the Council's organizational framework, issued by Council of Ministers Resolution No. (379) dated 07/07/1443H; and in accordance with Article (131 bis) of the Labor Law promulgated by Royal Decree No. (M/51) dated 23/08/1426H and its amendments, which pertains to the regulation of work in high-risk occupations - this Regulation has been developed in collaboration with relevant government entities and agencies, and in consultation with representatives of employers and workers, in line with best local and international practices and standards in occupational classification and risk management.

This Regulation aims to establish a comprehensive regulatory framework for the classification and licensing of high-risk occupations. It ensures that practitioners meet the required health, technical, cognitive, and skill-based qualifications to perform such occupations. Additionally, it outlines the responsibilities of relevant entities, employers, and workers, and sets mechanisms for training, qualification, monitoring, and enforcement, thereby contributing to the reduction of occupational injuries and diseases and improving occupational safety and health standards in the Saudi labor market.

## Article One:

For the purposes of this document, the following terms and expressions -wherever they appear- shall have the meanings assigned to them below, unless the context clearly indicates otherwise:

The Ministry	The Ministry of Human Resources and Social Development.
The Council	The National Council for Occupational Safety and Health.
The General Secretariat of the Council	The General Secretariat of the National Council for Occupational Safety and Health.
The Policy	The Comprehensive National Program Policy for Reporting Occupational Accidents, Injuries, and Diseases, and for Documenting Reports and the Results of Related Investigations.
The Senior Official	The Minister, Governor, Chief Executive Officer, President, Secretary-General, or any person acting on their behalf.
Employer	Any natural or legal person who employs one or more workers in return for remuneration.
Entity	Any ministry, government body, authority, agency, public institution, fund, or equivalent; as well as any independent body with legal public personality.
Establishment	Any enterprise managed by a natural or legal person that employs one or more workers in return for any form of remuneration.
Hazard	The potential for harm to safety, health, the environment, or property, arising from sources such as physical, chemical, biological, or psychosocial hazards.
Risks	The likelihood -whether high or low- of an individual being harmed as a result of hazards, with an indicator in place to assess the severity of potential harm, as referenced in the Reporting Policy.
Occupation	A job or role performed by an individual on a regular basis, requiring specialized skills and knowledge acquired through education or training, with the aim of providing a specific service or performing a particular task in exchange for wages or income.

Worker	Any natural person – male or female – who works for the benefit of an employer and under their management or supervision in return for wages, even if working remotely or outside the employer's direct oversight.
Employee	Any individual holding a public civil position in the state or performing its duties, regardless of the nature of the work or the job title, whether appointed or contracted on a permanent or temporary basis.
Work Environment	The set of conditions and factors surrounding the worker/employee in a permanent or temporary workplace, which directly or indirectly affect their performance and productivity.
High-Risk Work Environment	A work environment that involves high-risk conditions, activities, materials, or processes that may lead to serious injuries, occupational diseases, or fatalities among workers or employees.
High-Risk Occupations	Occupations in which individuals may be exposed - either continuously or intermittently - depending on the level, duration, and frequency of exposure - to high-risk activities and operations while performing their job duties.
Major Hazard Establishment	An establishment that, either permanently or temporarily, produces, processes, disposes of, handles, uses, or stores one or more hazardous substances or categories of such substances in quantities exceeding permitted thresholds - the exceedance of which results in the classification of the establishment as high-risk.
High-Risk Occupation Work Permit	A document issued by the competent authority granting a worker/employee the right to practice an occupation classified as high-risk, after verifying that the individual meets all approved requirements and standards.
Council Platform:	The electronic platform of the National Council for Occupational Safety and Health.
Occupational Incident / Work Accident	An unexpected and sudden event that occurs while performing job duties or due to work-related conditions, which may result in physical or psychological harm to the worker/employee or cause damage to property.
Occupational Disease	A disease that arises due to working in specific occupations or is caused by them and is not attributed to factors unrelated to the job, in accordance with the occupational diseases schedule.
Reporting of Occupational Incident or Disease	A process initiated immediately after identifying an occupational incident or disease, with the aim of enabling the competent authority to address the case.
Occupational Medical Examination	Investigative surveys and clinical assessments conducted for the purpose of preventing occupational diseases.
Occupational Safety and Health	The protection of the worker/employee from any work-related hazard that poses a threat to their safety or health, including physical, mental, and social well-being.
Protection and Prevention Measures	All preventive actions are implemented to reduce anticipated risks and losses.
Occupational Physician	A physician specialized in occupational medicine (Occupational Medicine specialist/consultant), certified by the Saudi Commission for Health Specialties. This medical field focuses on the health and safety of workers/employees in the workplace, aiming to prevent, diagnose, and treat work-related illnesses and injuries.
Competent Authority	Any entity responsible for implementing the provisions of this Regulation or related laws, regulations, and decisions.
Accredited Health Facilities	Facilities licensed by the Ministry of Health that have successfully met the accreditation requirements issued by the National Council for Occupational Safety and Health.

# 2 Chapter Two

## Objectives

## Article Two:

This Regulation aims to provide a framework for the classification and licensing of high-risk occupations, which includes the following:

1. Classification and licensing of occupations based on the type and severity of hazards, and the potential impacts associated with each occupation.
2. Ensuring the ability of the worker/employee to perform their duties safely and efficiently.
3. Defining pre-employment and periodic medical examinations and tests required for practitioners of high-risk occupations.
4. Enhancing compliance with local standards, regulations, and international agreements in the field of occupational safety and health.

# 3 Chapter Three

## Roles and Responsibilities

### Article Three:

The provisions of this Regulation apply to all employees and workers in the public, private, and non-profit sectors, whether working on a full-time or part-time basis, on permanent or contractual terms, and whether Saudi or non-Saudi.

### Article Four:

All entities/establishments shall comply with all the requirements and conditions set forth in this Regulation.

### Article Five:

The Senior Official or their designee in the public sector, and the Employer or their representative in the private and non-profit sectors, shall be responsible for the following:

1. Directing and monitoring the worker/employee to undergo the necessary training and occupational medical examinations for each occupation in order to obtain the required permits for practicing high-risk occupations.
2. Verifying that specialized training content related to work hazards in high-risk occupations is incorporated into the relevant training programs of the entity/establishment.
3. Notifying the Occupational Physician of any hazards that may affect the safety and health of the worker/employee while performing job duties.
4. Overseeing the process of reporting occupational incidents and diseases through the designated electronic platform and ensuring investigations are conducted and corrective actions are taken in accordance with the Comprehensive National Program Policy for reporting occupational incidents, injuries, and diseases, and documenting reports and investigation results.
5. Ensuring the implementation of preventive and regulatory measures related to the organization of work in high-risk occupations across all affiliated entities/establishments, and monitoring compliance.
6. Following up on the compliance of contracted entities to ensure implementation of the provisions of this Regulation.
7. Prohibiting the assignment of any worker/employee performing high-risk occupational tasks in the absence of valid permits or in the case of expired permits or failure to pass the required evaluations and medical tests.
8. Applying protection and prevention measures based on priority and as instructed by the authority and providing appropriate equipment and personal and collective protective gear in accordance with the hazards of each occupation, while ensuring proper implementation and conformity to the technical regulations and standards issued by the Saudi Standards, Metrology and Quality Organization in matters related to occupational safety and health.
9. Verifying that the worker/employee undergoes occupational medical fitness examinations for high-risk occupations as specified in the Regulation on Occupational Fitness Examinations and Non-Communicable Diseases.
10. Supporting compliance with the provisions of this Regulation.

### Article Six:

- A. The worker/employee shall be responsible for the following:
1. Applying individual and collective protection and prevention measures as required by the nature of the job tasks, ensuring that neither themselves, others, nor the work environment are exposed to any direct or indirect hazards, and promptly reporting to the entity/establishment any unsafe practices or deficiencies that may compromise occupational safety and health requirements.
  2. Obtaining the necessary training and professional qualification relevant to the job tasks, and securing the required licenses before commencing work.
  3. Disclosing any health symptoms, injuries, or occupational diseases, and providing the required health information in accordance with the approved form.
  4. Notifying the entity/establishment or their representatives of any practices or deficiencies that could affect their own safety or the safety of others.

- 
5. Cooperating with the entity/establishment or their representatives in undergoing medical examinations, training, and technical tests necessary to obtain the required licenses for practicing high-risk occupations.
- B. Any worker/employee may file a report with the Competent Authority regarding any violation committed by the entity/establishment related to non-compliance with the requirements and conditions of this Regulation. The authority shall ensure the protection of the whistleblower and the confidentiality of their identity.

# 4

## Chapter Four

### Classification of Occupations and Their Risk Levels

### Article Seven:

A worker's/employee's occupation is classified as high-risk based on the following criteria:

1. The actual work performed.
2. The job description.
3. The type of materials or physical, chemical, or biological factors the individual is exposed to.
4. The method of exposure to materials or factors as determined by risk assessment.
5. The duration or level of exposure to materials or physical, chemical, or biological factors according to the risk assessment.
6. Mortality statistics - analyzing death statistics associated with each occupation.
7. Occupational incident and disease statistics - evaluating the rates of incidents and occupational diseases associated with each occupation.
8. Incident outcomes - reviewing the consequences of incidents and occupational disease statistics to assess their overall impact.
9. The resulting harm to the safety of the worker/employee or others, to public safety, or to the environment.

### Article Eight:

High-risk occupations are classified based on the worker's/employee's rate of exposure to occupational incidents or diseases, or the likelihood of causing them, as follows:

1. Hazardous occupations involve working conditions that threaten the physical safety or mental health of the worker/employee due to the inherent nature of the job, such as operating heavy machinery, handling toxic substances, or working in dangerous environments like mines or high-altitude locations. These occupations are characterized by a high probability of direct and individual hazards and require specialized training or significant preventive measures.
2. Restricted occupations are associated with potential hazards that have broad societal impacts, including threats to the life of the worker/employee, the general public, property, or the environment if mishandled. These occupations require licenses or professional certifications in accordance with occupational requirements.

The supervising or licensing authority within the relevant economic sector, the Senior Official or their delegate, or the Employer or their representative, may upgrade the classification of hazardous occupations to restricted occupations based on the level of exposure and the extent of societal impact, provided it does not conflict with this Regulation or other applicable laws and regulations.

### Article Nine:

High-risk occupation activities consist of the following:

#	Hazard	Description
1	Working at Heights	The presence of the worker/employee at elevated locations and exposure to gravitational forces, which may result in, for example: <ul style="list-style-type: none"><li>- Falls of individuals from high places or elevated areas.</li><li>- Falling objects from heights or elevated areas.</li></ul>
2	Working in Confined Spaces	The presence of the worker/employee in fully or partially enclosed spaces with limited access, not intended for continuous occupancy, which may expose them to secondary hazards that could lead to fatalities or occupational diseases, such as: <ul style="list-style-type: none"><li>- Hazard related to ventilation or internal atmosphere - including oxygen deficiency or surplus, or the presence of toxic, asphyxiating, flammable, or explosive gases.</li><li>- Hazard related to space design - including the risk of entrapment, injury from sharp edges or corners, or falls due to uneven or unstable flooring.</li><li>- Hazard from energy sources - such as heat, electricity, or pressure.</li><li>- Hazard from insects or venomous animals.</li><li>- Hazard from lack of visibility or excessive noise.</li></ul>

#	Hazard	Description
3	Lifting Operations	The presence of the worker/employee within the area of mechanical lifting of heavy objects and equipment, which may result in, for example: <ul style="list-style-type: none"> <li>- Load drop incidents that can lead to fatalities or severe injuries due to crushing or being struck by the load or parts of the lifting equipment.</li> </ul>
4	Manual Handling	The act of a worker/employee manually lifting or transporting loads during work, which may result in, for example: <ul style="list-style-type: none"> <li>- Injuries to joints, muscles, tendons, the spine, and fingers or toes due to dropped loads.</li> </ul>
5	Electrical Energy and Insulation	Exposure of the worker/employee to electric shock, which may result in, for example: <ul style="list-style-type: none"> <li>- Fatalities.</li> <li>- Severe injury incidents such as burns or amputations.</li> </ul>
6	Mechanical Energy and Insulation	Exposure of the worker/employee to mechanical hazards, such as: <ul style="list-style-type: none"> <li>- Collision incidents, impacts, or entrapment.</li> <li>- Crushing by equipment or moving parts of machines and equipment, whether rotational or translational.</li> </ul> <p>This may lead to injuries such as bruises, fractures, or amputations.</p>
7	Movement of Vehicles and Equipment in the Workplace	The presence of the worker/employee in areas where vehicles and equipment are operating within the workplace, which may result in, for example: <ul style="list-style-type: none"> <li>- Run-over incidents.</li> </ul>
8	Handling of Presses, Hydraulic Lifts, and Pressure-Operated Equipment	The presence of the worker/employee near or interacting with equipment powered by hydraulic energy or compressed air, which may result in, for example: <ul style="list-style-type: none"> <li>- Incidents involving the release or loss of energy control, leading to occupational injuries.</li> </ul>
9	Physical Phenomena (Noise / Lighting / Vibrations / Heat)	The presence of the worker/employee in an uncomfortable work environment, such as: <ul style="list-style-type: none"> <li>- Intense lighting.</li> <li>- High noise levels.</li> <li>- Use of machines and equipment that generate vibrations, or interaction with surfaces or materials of extremely high or low temperatures.</li> </ul> <p>This may lead to hearing loss, heat stress, heatstroke, or hand-arm vibration syndrome.</p>
10	Excavation Activities and Handling of Soil and Rocks	The worker/employee performing or being near excavation activities, whether manual or mechanical, such as: <ul style="list-style-type: none"> <li>- Flying debris of soil and rocks.</li> <li>- Excavating in areas containing gas, electricity, or water supply lines.</li> </ul> <p>This may result in incidents related to the uncontrolled release of the associated type of energy.</p>
11	Welding and Hot Cutting Operations	The worker/employee handling cutting or welding machines that generate high temperatures and emit high-temperature sparks or fragments during the cutting process, which may result in, for example: <ul style="list-style-type: none"> <li>- Burns of varying degrees.</li> <li>- Explosions in the presence of flammable gases in the work environment or respiratory diseases.</li> </ul>
12	Lathes and Milling Machines (Moving Parts and Components)	The worker/employee operates or handles lathes and milling machines, which may result in, for example: <ul style="list-style-type: none"> <li>- Upper body injuries if rotating or sharp parts of the machines are not properly controlled.</li> </ul>

#	Hazard	Description
13	Rotating Equipment and Grinding/Sharpening Machines (Moving Parts and Components)	The worker/employee handling hand-held rotating cutting tools and grinding or sharpening machines, where improper handling or loss of control may result in, for example: <ul style="list-style-type: none"> <li>- Occupational injuries such as loss of limbs or fingers.</li> </ul>
14	Handheld and Stationary Tools	The worker/employee handling portable or stationary manual work tools, such as plumbing and carpentry tools, where improper use may result in, for example: <ul style="list-style-type: none"> <li>- Various injuries to different parts of the body.</li> </ul>
15	Handling of Chemical Substances	The presence of the worker/employee in an area containing chemical substances, which may vary in nature from toxic to explosive, flammable, or corrosive materials. Improper handling or loss of control may cause various injuries to those handling the substances or others in the surrounding area, depending on the properties of the material.
16	Handling of Pesticides, Cleaning Agents, and Disinfectants	The worker/employee handling or being present in a workplace where pesticides or cleaning agents are used, which fall under the definition of chemical substances. Exposure to these materials may result in, for example: <ul style="list-style-type: none"> <li>- Allergic or respiratory illnesses</li> <li>- Poisoning from organophosphorus compounds</li> </ul>
17	Working in Hazardous and Explosive Atmospheres	The presence of the worker/employee in a work environment classified as explosive, such as: <ul style="list-style-type: none"> <li>- The presence of materials that may cause physical burns</li> <li>- Fatalities</li> </ul>
18	Ventilation, Heating, and Cooling	The presence of the worker/employee in a work environment that is unsuitable in terms of ventilation or low temperatures and lack of heating, which may result in, for example: <ul style="list-style-type: none"> <li>- Occupational respiratory diseases or frostbite</li> </ul>
19	Radiation	The worker or employee handling or being present in an area containing ionizing radiation, whether emitted from machines or radioactive materials, which if improperly handled, uncontrolled, or poorly stored may result in, for example <ul style="list-style-type: none"> <li>- Acute radiation syndrome from high-dose exposure</li> <li>- Cancerous tumors from long-term exposure</li> </ul>
20	Vehicle Operation	The worker or employee operating various types of vehicles, whether heavy or light, or the presence of individuals in vehicle pathways or inside the vehicles themselves. Improper driving may result in, for example <ul style="list-style-type: none"> <li>- Traffic incidents such as vehicle overturning</li> <li>- Run-over accidents involving pedestrians</li> </ul>
21	Working in Remote and Isolated Areas	The presence of the worker or employee in workplaces that are remote or isolated from residential communities, which may, in the absence of timely medical intervention, lead to, for example <ul style="list-style-type: none"> <li>- Physical and mental exhaustion</li> <li>- Stress and isolation</li> <li>- Increased risk of substance-related illnesses</li> <li>- Limited access to advanced healthcare services when urgently needed</li> </ul>
22	Handling of Infectious Diseases	The worker or employee handling infectious diseases and being exposed to or dealing with contaminated materials, such as <ul style="list-style-type: none"> <li>- The use of injections for medical or other purposes, which may lead to infections such as viral hepatitis of various types, acquired immunodeficiency syndrome, and others</li> </ul>
23	Handling of Medical Waste	The worker or employee handling medical waste, which may result in, for example <ul style="list-style-type: none"> <li>- Injuries caused by sharp objects</li> </ul>

#	Hazard	Description
		<ul style="list-style-type: none"> <li>- Exposure to infectious bacterial or viral diseases</li> </ul>
24	Working Under High Temperatures and Sun Exposure	<p>The presence of the worker or employee in a work environment with high temperatures, whether due to natural causes such as sunlight or industrial sources such as high-temperature equipment like furnaces, which may result in, for example</p> <ul style="list-style-type: none"> <li>- Heat stress, sunstroke, or severe dehydration</li> <li>- Burns in case of direct contact</li> </ul>
25	Biological Energy	<p>Exposure of the worker or employee to sources of biological agents, such as</p> <ul style="list-style-type: none"> <li>- Infected, venomous, or wild insects and animals</li> <li>- Viruses and microbes, which may lead to diseases such as tetanus, rabies, or brucellosis</li> </ul>
26	Psychosocial	<p>Exposure of the worker or employee to sources of psychological or social stress resulting from the work environment, such as</p> <ul style="list-style-type: none"> <li>- Working in shifts or rotating schedules, which may lead to sleep disorders, chronic fatigue, or reduced concentration</li> <li>- Exposure to physical or verbal assault</li> </ul>

# 5 Chapter Five

## Occupational Fitness Examinations

### Article Ten:

Occupational fitness examinations for high-risk occupations shall be conducted in accordance with the requirements and conditions outlined in the Occupational Fitness Examinations and Non-Communicable Diseases Regulation, and are categorized as follows:

1. The occupational fitness medical examination for restricted occupations
2. The occupational fitness medical examination or periodic preventive checkups for hazardous occupations

The occupational fitness medical examinations included in the forms for high-risk occupation practitioners are subject to the color-coded classification of examination levels, as outlined in Paragraph Four of Article Ten of the Occupational Fitness Examinations and Non-Communicable Diseases Regulation.

### Article Eleven:

1. Occupational fitness for high-risk occupations shall be assessed based on the following classifications:
  - A. Medically fit and permitted to practice the occupation.
  - B. Medically fit with specific restrictions or considerations that must be followed when performing the occupation, along with a defined time period. The senior official or their designee, and the employer or their representative, must adhere to the stated restrictions, considerations, recommendations, or rehabilitation plan to ensure the safety of the worker or employee and the work environment, and to enable their safe return to duty.
  - C. Medically unfit and not permitted to practice the occupation, with the period of unfitness determined by the occupational physician.
2. The worker or employee shall not continue practicing their occupation if the occupational fitness requirements are not met after a periodic examination. The responsible administration must take appropriate steps to change the worker's occupation unless it is proven that they can perform their job tasks efficiently and without risk to themselves or others, based on additional examinations or recommendations determined by a qualified occupational physician. This is without prejudice to Article 38 and Article 60 of the Labor Law.

If the worker or employee disputes the examination results, the case shall be referred to a committee consisting of at least three members, two of whom must be occupational medicine specialists. The committee may consult other experts if needed. The senior official or their designer, or the employer or their representative, may exempt certain cases from changing occupations and allow them to remain in their current role, provided that any restrictions are observed and that the safety and health of the worker or employee and others are not compromised, subject to the committee's approval.

3. If a worker or employee's occupation is changed due to lack of medical fitness, the senior official or their designee, or the employer or their representative, shall ensure that the individual receives appropriate training and qualification for the alternative occupation. This guarantees alignment between their health condition and the demands of the new role. Their health status shall be re-evaluated periodically to assess the possibility of returning to their original occupation once fitness requirements are met.

### Article Twelve:

1. The worker or employee has the right to object to the results of the occupational fitness assessment within a period not exceeding thirty (30) days from the official notification date of the result.
2. The Council shall establish an independent review committee composed of specialists in occupational medicine and relevant fields, with the participation of a legal expert, to review objections. The committee shall issue its decision within a period not exceeding fifteen (15) working days.

The committee's decisions shall be binding on the concerned entities unless formally appealed before the competent authorities. This does not affect the worker's or employee's right to resort to the competent judicial bodies in accordance with the applicable regulations.

**Article Thirteen:**

Workers or employees and supervisors involved in high-risk occupations and tasks must possess the necessary cognitive and skill-based competencies in occupational safety and health, in accordance with the nature of the hazards associated with the actual work performed in their occupation.

**Article Fourteen:**

A worker or employee engaged in a high-risk occupation involving specialized tasks such as but not limited to operating forklifts or using spider ropes to access elevated areas must have completed a training program aligned with the actual nature and specialization of the occupation through an accredited center in the field. The individual must also apply for a professional practice permit via the Council Platform in coordination with the competent authorities if necessary.

# 6 Chapter Six

## Final Provisions

**Article Fifteen:**

The Council shall develop the procedures and measures regulating training and training materials, and shall approve training programs and High-Risk Occupation Work Permits, and update them when needed in coordination with the relevant Entities.

**Article Sixteen:**

Any person who violates any of the provisions set out in this Regulation shall be subject to the penalties stipulated in the applicable system, and the person against whom the penalty is imposed has the right to appeal it in accordance with that system.

**Article Seventeen:**

The Council shall issue the regulatory rules, provisions, implementation and follow-up mechanisms, and the related guidelines of this Regulation in coordination with the relevant Entities.

**Article Eighteen:**

The Council or its designee shall coordinate with the Ministry and the relevant Entities when updating the classification list of High-Risk Occupations.

**Article Nineteen:**

This Regulation shall be published in the Official Gazette and shall enter into force 180 days from the date of publication.

# 7 Chapter Seven

## Appendix

### First: List of High-Risk Occupations

The list below has been determined based on the rate and level of exposure of the individual (Worker/Employee) to Occupational Incidents or Occupational Diseases, or the likelihood of causing them. It should be noted that the classification of Occupations is variable and not fixed, in accordance with the classification results mentioned in Article Eight and the Hazards in Article Nine of this Regulation.

Number	Occupation	Occupation Code	Number	Occupation	Occupation Code
1	Construction Worker	931301	15	Formwork Carpenter	711502
2	Construction Laborer	931201	16	Ship Mooring Worker	835004
3	Quarry Worker	931102	17	Ship Equipment Operator	835003
4	Mine Worker	931101	18	Tower Crane Operator	834402
5	Demolition Worker	931303	19	Forklift Operator	834401
6	Light Equipment Mechanic	723303	20	Crane Movement Coordinator	834303
7	Heavy Equipment Mechanic	723302	21	Winch Operator	834302
8	Bus Mechanic	723102	22	Crane Operator	834301
9	Car Mechanic	723101	23	Heavy Equipment Driver	834207
10	Bladesmith	722104	24	Mobile Irrigation Equipment Operator	834104
11	Power Hammer Blacksmith	722103	25	Mobile Pest Control Equipment Operator	834103
12	Forging Press Blacksmith	722102	26	Agricultural Equipment Operator	834102
13	Carpenter	711501	27	Turbine Operator	818203
14	Structural Wood Carpenter	711503	28	Wood Cutting Machine Operator	817209
